Get BACnet MS/TP subordinate Data into your Siemens S7 PLC

The 460BMSC moves data between your BACnet MS/TP Subordinates to your Siemens S7 PLC.

Best of all, the product comes with 5-year warranty.

How Do I Use the 460BMSC-N34 in My Application?

BACnet analog, binary and CSV data segments can be converted to corresponding data types as your Siemens PLCs and transferred over to them and vice versa. It's really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to three mathematic functions.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

Server

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
