

460BMSTCP-N2E

Ethernet TCP/IP to BACnet MS/TP

FEATURES

- Fully configurable BACnet MS/TP Subordinate
- BACnet MS/TP supports device, binary I/O, analog I/O, and character string value object types
- Support up to 10 TCP/IP devices
- Parse & concatenate
 ASCII/HEX data in up
 to 50 segments by
 delimiter or offset
- Effortless Browser Based Configuration, no programming software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

Get Ethernet TCP/IP Data into your BACnet MS/TP Network

The 460BMSTCP moves data between up to 10 Ethernet TCP/IP devices and a BACnet MS/TP Building Automation System (BAS). It's the perfect tool to tie Ethernet TCP/IP devices into your BACnet MS/TP building automation system. A great tool to connect printers, RFID devices, LED displays, and PC applications to a BACnet MS/TP system.

How Do I Use the 460BMSTCP-N2E in My Application?

BACnet analog, binary, and CSV data segments can be converted to ASCII and delivered to your ASCII controller. If you need to command the BACnet/IP servers, an incoming ASCII string can be parsed and directed to user-defined data location. It really is that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

Specification

BACNET MS/TP RESPONDER FEATURES	
Operation Mode	BACnet MS/TP Manager Responder
Supported Object Types	Device, Binary I/O, Analog I/O, Character String Value
Supported Service Codes	Read & Read Multiple-B, Write & Write Multiple-B, COV & COV unsolicited-B, Device Dynamic Binding-B, Dynamic Object Binding-B
Maximum Connections	1
Analog Objects Supported	1200 Input and 1200 Output
Binary Objects Supported	1600 Input and 1600 Output
ETHERNET TCP/IP FEATURES	
Operation Mode	Client or Server
Maximum Number of Devices Supported	10
Maximum Number of Characters Transferred	1024
Delimiter Processing	Incoming delimiters can be automatically removed; Outgoing delimiters automatically added if configured
Parsing	Parse String of ASCII Data in up to 50 Segments by Delimiter or Offset
Concatenation	Concatenate up to 50 segments/strings of ASCII data with optional delimiter
INCLUDED WITH GATEWAY	
3' power cable with flying leads	5-year hardware warranty
IPSetup software – automatically locates RTA gateway on the network	Unlimited firmware feature upgrades for life
CAT5 crossover cable for direct connection to PC during programming	Complete, unlimited access to our industry leading support staff
Manual
