- Fully configurable BACnet/IP server
- BACnet/IP supports device, binary I/O, analog I/O, and character string value object types
- Get PLC data table entries encoded in either JSON or XML
- Bidirectional data transfer supports both HTTP GET and POST
- Effortless Browser Based Configuration, no programming software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

### Access your BACnet/IP Building Management System from a Web Client

With the 460BSWI, it is easier than ever to monitor your BACnet/IP control system data via a web applications. Use that data to easily build a dashboard, archive data, or create a sophisticated alarm system. The gateway presents the data as JSON or XML files transferred via HTTP commands. Best of all, the product comes with 5-year warranty.

### How Do I Use the 460BSWI-NNA1 in My Application?

First, you configure the 460BSWI using the browser-based configuration pages. You'll identify the data set to expose on BACnet. Once that's complete, you'll map, name and group the data to be presented as XML or JSON files. Your application can issue standard HTTP GET or POST instructions to move data into your application. Up to 100 data points can be moved in each direction.

### Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
