

## Connect Siemens S7 PLCs to DF1 PLCs

### FEATURES

- Support for PLC5, SLC and MicroLogix PLCs
- Connect up to 32 DF1 serial devices
- Supports connections to five Siemens S7 PLCs
- Up to 150 read and 150 write requests per connection
- Effortless Browser Based Configuration, no programming software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

### Map Your Legacy PLC Data Tables into Your Siemens S7 PLCs

You can now map your legacy serial PLCs data tables over to your Siemens S7 PLCs! Any of your old serial PLCs like the PLC5, SLC, or MicroLogix can now provide data to S7 PLCs.

It's the perfect tool to keep those old legacy PLCs from the scrap pile.

### How Do I Use the 460DFMSC-NNA1 in My Application?

For most applications, the mapping is very straightforward. PLC data table values like N7:200 and F9:1 are mapped directly into your Q and I addresses in your Siemens S7 PLCs.

No message instructions and no ladder to alter in many cases.

### Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
