- 5-Year Hardware Warranty

Map Your Legacy PLC Data Tables into Your OPC Client

You can now map your legacy serial A-B PLCs data tables to your OPC Clients! Any of your old serial PLCs like the PLC5 or SLC can now provide data to OPC Clients. Best of all, the product comes with 5-year warranty.

How Do I Use the 460DHMUS-D2E in My Application?

For most applications, the mapping is very straightforward. PLC data table values like N7:200 and F9:1 are mapped directly into OPC Objects to be read by your OPC Clients.
It really is that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
