Get Your EtherNet/IP Adapters Connected Directly to the Data Table of your Legacy Allen-Bradley PLC

The 460ECETC moves data between up to 32 EtherNet/IP adapter devices and up to five legacy Allen-Bradley PLCs.
Have a legacy Allen-Bradley PLC that doesn't support EtherNet/IP? Move data from your EtherNet/IP adapter devices to low-level legacy Allen-Bradley PLCs like the Micrologix, SLC 505, and PLC 5E.

How Do I Use the 460ECETC-N34 in My Application?

You allocate two blocks in your Allen-Bradley PLC. One for write data accepting data from your EtherNet/IP devices. The other for read data to your EtherNet/IP devices. Great tool to add EtherNet/IP capability to legacy Allen-Bradley PLC.
It's really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to three mathematic functions.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
