Get Your BACnet MS/TP System Connected Directly to the Data Table of Your Allen-Bradley PLC

The 460ETCBMS moves data between a BACnet MS/TP system and Allen-Bradley PLCs.

With the 460ETCBMS, you are making a direct connection between BACnet MS/TP Manager data and user-defined tags or registers in the data table of your Allen-Bradley PLCs. There is no polling from the PLC or EtherNet/IP scan lists to arrange.

How Do I Use the 460ETCBMS In My Application?

You allocate two blocks in your Allen-Bradley PLC. One area is write only tags or register blocks accepting data from your BACnet MS/TP Manager. The other area is read only tags or register blocks to send data to your BACnet MS/TP Manager.

It's really that simple.
