Interconnect Modbus RTU Servers

FEATURES

- Fully configurable Modbus RTU Client

- Connects up to 32 Modbus RTU Servers

- Effortless Browser Based Configuration, no programming software is required

- 5-Year Hardware Warranty

Connect Up to 32 Modbus RTU Servers

The 460MM can handle data exchange with up to 32 Modbus RTU Server devices at one time.
Best of all, the product comes with 5-year warranty.

How Do I Use the 460MM-N34 in My Application?

The 460MM also allows for data manipulation when mapping. You can scale or adjust your data before it reaches its destination.
It really is that simple..

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.
RTU Servers   460MM-N34   RTU Servers

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
