## 460MMA-N700

### Modbus RTU Servers to ASCII

## **FEATURES**

- Fully configurable Modbus RTU Client
- Connects up to 32 Modbus RTU Servers
- Parse ASCII/HEX data in up to 50 segments by delimiter or offset
- Concatenate up to 50 data segments into a string
- Effortless Browser Based Configuration, no programming software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

#### Deliver Data from Modbus RTU Server Devices to an ASCII-Based System or Controller

The 460MMA moves data between up to 32 Modbus RTU Server devices and serial ASCII. It's a great tool to implement Modbus RTU devices into your PC or embedded applications that support raw ASCII data.

Best of all, the product comes with 5-year warranty.

#### How Do I Use the 460MMA-N700 in My Application?

Modbus data segments can be converted to ASCII and concatenated into a string delivered to your ASCII device. If you need to command the Modbus RTU devices, an incoming ASCII string can be parsed and directed to user-defined Modbus data location.

Need to scale your data or manipulate it with other math functions? The 460MMA allows you to add scaling to any data, apply simple math operations, add alarming, and control the request speeds of your server devices.

#### Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

# **Specification**

MODBUS RTU CLIENT FEATURES	
Operation Mode	Modbus RTU Client
Function Codes Supported	1,2,3,4,5,6, 15 & 16
Swapping	Byte and Word Swapping
Maximum Modbus RTU Server Devices	32
Number Read/Write Scan Lines per RTU Server Device	200 Total - 100 reads & 100 writes
Scan Line Support	Up to 125 Registers or 512 Coils
ASCII FEATURES	
Operation Mode	Bidirectional ASCII Transmit and Receive
Maximum Number of Devices Supported	2
Concatenation	Concatenate up to 50 segments data in a delimeted ASCII sting
Maximum Number of ASCII Characters Transferred	1024 in each direction
Delimiter Processing	Incoming delimiters can be automatically removed; Outgoing delimiters automatically added if configured
Parsing	Parse string of ASCII data in up to 50 segments by delimiter or offset
INCLUDED WITH GATEWAY	
3' power cable with flying leads	5-year hardware warranty
IPSetup software – automatically locates RTA gateway on the network	Unlimited firmware feature upgrades for life
CAT5 crossover cable for direct connection to PC during programming	Complete, unlimited access to our industry leading support staff
Manual
