- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

Connect Your DH+ PLC5 or SLC PLC to a Modbus RTU Client Device

Your legacy Allen-Bradley serial PLC can now communicate with a Modbus RTU Client.
It's the perfect tool to save legacy PLCs from the scrap pile and extend their useful life.

How Do I Use the 460MRSDHM-D2E in My Application?

Modbus register and coil data is mapped to files in the PLCs data tables. For example, you can map N7:200 to Modbus register 40200 to be read by your Modbus Client. Bi-directional data transfer is supported.
It really is that simple.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

RTU Clients | 460MRSDHM-D2E | DH+ Slaves

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
