460MRSTCP-NNA4

Ethernet TCP/IP to Modbus RTU Client Gateway

FEATURES

- Fully configurable Modbus RTU Server
- Move up to 100 groups of 512 contiguous coils or 512 contiguous registers to or from your Modbus RTU Client
- Support up to 10 TCP/IP devices
- Parse & concatenate ASCII/HEX data in up to 50 segments by delimiter or offset
- Effortless Browser
 Based Configuration,
 no programming
 software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

Get Data from a Modbus RTU Client into Your Ethernet TCP/IP Devices

The 460MRSTCP moves data between a Modbus RTU Client and an ASCII-based Ethernet device. It allows you to convert the ASCII data strings into meaningful data types for use in your controller.

Best of all, the product comes with 5-year warranty.

How Do I Use the 460MRSTCP-NNA4 in My Application?

Up to 1024 characters can be parsed into up to 50 segments. Each segment can be assigned a data type and mapped to a user-defined register or coil locations. Up to 50 segments of data on Modbus data can be concatenated and delivered as string. It's really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to three mathematic functions. Need to add or remove delimiters between segments, it does that too.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

Specification

MODBUS RTU SERVER FEATURES		
Operation Mode	Modbus RTU Server	
Function Codes Supported	1,2,3,4,5,6, 15 & 16	
Swapping	Byte and Word Swapping	
Maximum Modbus RTU Client Connections	1	
Contiguous Data Areas	200 Total - 100 reads & 100 writes	
Data Area Limits	512 Contiguous Coils or 512 Contiguous Registers	
ETHERNET TCP/IP FEATURES		
Operation Mode	Client or Server	
Maximum Number of Devices Supported	10	
Maximum Number of Characters Transferred	1024	
Delimiter Processing	Incoming delimiters can be automatically removed; Outgoing delimiters automatically added if configured	
Parsing	Parse String of ASCII Data in up to 50 Segments by Delimiter or Offset	
Concatenation	Concatenate up to 50 segments/strings of ASCII data with optional delimiter	
INCLUDED WITH GATEWAY		
3' power cable with flying leads	5-year hardware warranty	
IPSetup software – automatically locates RTA gateway on the network	Unlimited firmware feature upgrades for life	
CAT5 crossover cable for direct connection to PC during programming	Complete, unlimited access to our industry leading support staff	
Manual
