Modbus RTU to Modbus TCP/IP

Get Your Modbus TCP/IP Client Connected to a Modbus RTU Master

The 460MSMRS moves data between a Modbus TCP/IP Client device and a Modbus RTU Master device. Data can be freely moved between your Modbus RTU and Modbus TCP/IP controllers.

Best of all the product is Made in the USA, is always in stock and comes with 5 year warranty.

How do I use 460MSMRS-N2E in my application?

To your Modbus TCP/IP Client device the gateway will act as a Modbus TCP/IP Server. To your Modbus RTU Master device the gateway acts as a Modbus RTU Slave. In the gateway you configure the registers and coils that can be accessed on each protocol.

It’s really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to 3 mathematic functions.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product’s development, and support doesn’t require a ticket or 24-hour wait.

Try the RTA difference today! Call us at 800-249-1612 or check out our solutions at www.rtautomation.com.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That’s how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience, all the better. Thirty years later, our mission remains the same: to move your data where you need it, when you need it and how you need it.
Specifications

**ELECTRICAL / ENVIRONMENTAL**
- **DC Input Voltage**: 12-24 VDC
- **Maximum Baud Rate**: 115K baud
- **Operating Temperature**: -40°C to 85°C
- **Certification**: RoHS-Compliant, UL, CUL, CE Approvals, Class I Div 2

**DIMENSIONS**

**ENCLOSURE / HARDWARE**
- **Size**: 5.40” x 3.83” x 1.19”
- **Weight**: 7.6 oz
- **Enclosure Type**: Anodized Aluminum
- **Mounting**: Din rail or panel mount
- **LEDs**: Power LED & 2 general purpose LEDs on side

**GATEWAY FEATURES & FUNCTIONS**

**Alarming**
- Set <, <=, >, >=, ==, !=, and change-of-state rules on any data moving through the gateway. If alarm rule is triggered an email notification can be sent.

**Gateway Security**
- You can configure up to 9 different users access to diagnostic and configuration screens.

**Translation Table**
- Allows for data manipulation during protocol translation. Scaling and other data format changes can occur in the gateway.

**Status and Counters**
- Protocol specific status, counters, and error messages are accessible within the gateways diagnostics page. They can also be delivered to a connected device.

**Diagnostic Logging Page**
- Allows users to see and log start up sequences, protocol specific messages & error messages.

**INCLUDED WITH GATEWAY**
- 3’ power cable with flying leads
- 5-year hardware warranty
- IPSetup software – automatically locates RTA gateway on the network
- CATS crossover cable for direct connection to PC during programming
- Gateway Security
- Translation Table
- Status and Counters
- Diagnostic Logging Page

**NOT EXACTLY WHAT YOU WERE LOOKING FOR?**
Real Time Automation offers a full line of gateway products. If this is not the one you were looking for, give us a call at 1-800-249-1612. Or, check out a listing at www.rtautomation.com/products. We also offer custom gateways to help customers dealing with unique needs or proprietary protocols.
