

PROFINET IO Controller to Amazon Web Services (AWS)

FEATURES

- Fully configurable PROFINET device
- Supports up to 1280 bytes of data in each direction on PROFINET IO
- AWS Certified Product
- Allows factory floor based devices to move its data to IT
- Effortless Browser Based Configuration, no programming software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warranty

Bridge a PROFINET Controller to AWS IoT Core

The 460PSAWS moves data between a PROFINET controller and the AWS platform. Allowing you to easily log data and leverage in populating dashboards. Best of all, the product comes with 5-year warranty.

How Do I Use the 460PSAWS-NNA1 in My Application?

PROFINET IO data is mapped directly to and from topics in AWS. The gateway will act as a standard PROFINET IO device to your PLC. SSL transport layer security protects the data moving from your operations network to the cloud.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

AWS IoT Core

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**
