460PSBC-N2EW

Wireless BACnet/IP Servers to PROFINET IO

FEATURES

- Fully configurable PROFINET device
- Supports up to 1280 bytes of data in each direction on PROFINET IO
- Fully configurable BACnet/IP client
- BACnet/IP supports device, binary I/O/V, analog I/O/V, multistate I/O/V, and character string value object types
- Effortless Browser
 Based Configuration,
 no programming
 software is required
- Simple data translation allows you to manipulate data as it passes between protocols
- 5-Year Hardware Warrantv

Get Your BACnet/IP Server Devices Connected to a PROFINET IO Controller over Wi-Fi

The 460PSBC moves data between a network of up to 32 BACnet/IP servers and a PROFINET IO controller using Wi-Fi IEEE 802.11 b/g/n at 2.4GHz with AES encryption 128-bit.

With the 460PSBC, you are making a direct connection between PROFINET IO data and your BACnet/IP servers.

How Do I Use the 460PSBC-N2EW in My Application?

BACnet/IP server data will be mapped into 10 PROFINET IO slots. Each slot will be assigned a data type and consist of up to 128 bytes of data. This data is mapped to and from BACnet/IP analog and binary objects.

It's really that simple. Need to modify your data as it passes from one protocol to the other? No problem. Each data mapping you apply can be modified with up to three mathematic functions. Add 4 to a value, multiply by 4 and divide by 10 with ease.

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: To move your data where you need it, when you need it, and how you need it.

Specification

| PROFINET SERVER FEATURES | | |
|---|--|--|
| Maximum Number of Slots | 10 Slots in, 10 Slots out | |
| | , | |
| Slot Data Segment Sizes | 8, 16, 32, 64 or 128 Bytes | |
| Each Slot Can be Defined for a Single Data Type of | Int8, int16, int32, int64, UInt8, Uint16, Uint32, Uint64, float, double, binary8, binary16 or binary32, Short String | |
| Total Data Supported in Each Direction | 1280 Bytes | |
| Maximum Profinet IO Controller Connections | 1 | |
| String Support | 1 string per slot | |
| BACNET IP CLIENT FEATURES | | |
| Operation Mode | BACnet/IP Client | |
| Supported Object Types | Device, BI/BO/BV, AI/AO/AV, MI/MO/MV, Character String Value | |
| Supported Service Codes | Read Property-A, Read Property Multiple-A, Write Property-A, Write Property Multiple-A, Device Dynamic Binding-A | |
| Maximum Connections | 32 | |
| Number Read/Write Scan Lines per Device | 200 Total - 100 reads & 100 writes | |
| Scan Line Support | Up to 128 Objects | |
| INCLUDED WITH GATEWAY | | |
| 3' power cable with flying leads | 5-year hardware warranty | |
| IPSetup software – automatically locates RTA gateway on the network | Unlimited firmware feature upgrades for life | |
| CAT5 crossover cable for direct connection to PC during programming | Complete, unlimited access to our industry leading support staff | |
| Manual | | |

| Power LED & 2 general purpose LEDs on side | |
| S | |
| Set <, <=, >, >=, ==, !=, and change-of-state rules on any data moving through the gateway. If alarm rule is triggered an email notification can be sent. | |
| You can configure up to 9 different users access to diagnostic and configuration screens. | |
| Allows for data manipulation during protocol translation. Scaling and other data format changes can occur in the gateway. | |
| Protocol specific status, counters, and error messages are accessible within the gateway's diagnostics page. They can also be delivered to a connected device. | NOT EXACTLY WHAT YOU WERE LOOKING FOR? Real Time Automation offers a full line of gateway products. Give us a call at 1-800-249-1612. Or, check out a listing at www.rtautomation.com/products. We also offer customizations for unique applications. |
| Allows users to see and log start up sequences, protocol specific messages & error messages. | |
