

Connect Generic MQTT Brokers to AWS or Azure

FEATURES

- Bring your factory data to the cloud
- Supports up to 3 MQTT broker connections
- Effortless Browser Based Configuration, no programming software is required
- 5-Year Hardware Warranty

Connect up to Four MQTT Brokers to AWS or Azure

The 460QT allows you connect multiple in-house MQTT brokers to AWS or Azure. Perfect for bridging OT based MQTT brokers to cloud-based applications. Best of all, the product comes with 5-year warranty.

How Do I Use the 460QT-NNA4 in My Application?

Use data manipulation to modify your data as you transfer it between devices. The manipulation fields allow up to three operations. It really is that simple..

Why Use Real Time Automation as a Gateway Supplier?

While there are certainly other companies offering protocol gateways, there is no one who provides the level of support and service that you receive from RTA.

When you call, a live person answers the phone. When you talk with sales, you will get honest answers and recommendations. When you get support, it is from an engineer who had a hand in the product's development, and support doesn't require a ticket or 24-hour wait.

Broker Devices

460QT-NNA4

Broker Devices

A Solution, A Philosophy, the RTA Way. We understand the long hours spent on a factory floor and the pressure to keep a line running and product flowing. That's how Real Time Automation came to be. You want easy-to-use solutions where the hardest part is to open the box. You need customer support second to none. If you get all that and a fun customer experience all the better. Thirty years later, our mission remains the same: **To move your data where you need it, when you need it, and how you need it.**

MQTT CLIENT FEATURES
